

MO-HEP™

Mobile HEPA Filtered Bedding Disposal

Mo-Hep™ is designed to protect technicians from breathing airborne particles of waste bedding, dander, animal waste and food particles when dumping dirty caging. The Mo-Hep™ is specifically designed for non-quarantine applications.

The Mo-Hep™ is constructed of impact resistant polypropylene and acrylic materials. Room air, dust, particulate and gaseous vapors are pulled through the dump orifice and then through filters by a 110 Volt/ 60 Hz blower operating at 160 CFM. Exhaust air is HEPA filtered (99.97% at .3 Microns). Uses standard HVAC pre-filter material.

- Mo-Hep™ is equipped with casters for easy handling and mobility to and from the work areas.
- Cost effective solution for bedding disposal
- Nearly silent operation (50% Quieter than a household hair dryer)
- Low cost of operation

Options

- Extra Barrel
- Biohazard Bags

Capacity:

- 25-32 gallon
- Box: 12" x 12" x 24" high

Dimension:

24" L x 34" D x 40" H
